Bag formats and indicative loadability

Indian-origin rice selection | Indicative specifications confirmed at quotation

Listed bag materials: PP, non-woven, LDP / BOPP, jute and customized formats. The table shows the stated indicative metric tons per 20-foot container by bag size and material.

BAG MATERIAL	1 KG	2 KG	5 KG	10 KG	20 KG	25 KG	40 KG	50 KG
LDP / BOPP	20	20	22	22	22.5	22.5	23	23
Non-woven	22	22	24	24	24	24	24	24
PP	-	-	24	24	24	24	24	24

Values in the table are metric tons per 20-foot container. A dash means no listed PP load for that size.

For 1 kg, 2 kg and 5 kg bags packed in master cartons, the listed load is 20 metric tons.

Jute and customized packing can be discussed; container load depends on the final packing arrangement.

Request your rice quotation

Send your target variety and destination so the specification can be confirmed.

- 1 Variety, processing grade and grain-length requirement
- 2 Broken percentage, moisture and sorting specification
- 3 Bag material, size and private-label artwork
- 4 Monthly quantity and destination port
- 5 Required certificates, Incoterm and shipment timing
